Date: 18 Feb 2021

Sub: Seminar by Prof Shantanu Bhowmik on recycling of plastics into useful products

We are pleased to inform that Prof Shantanu Bhowmik, HoD, Aerospace Engineering, Amrita Vishwa Vidyapeetham, Coimbatore, Tamil Nadu will deliver a talk on recycling of plastic waste to plastic composite products. It will be held in e-class room 3.21 in old college building from 3:00 pm today (18 Feb 2021).

Prof Bhowmik is well known for his contribution towards development of Light weight bullet proof composite. He has also made pioneering efforts in recycling of thermocol which contributes to around 7600 tons of waste every day. His team has also found a solution to recycle multi-layered plastics which could then be converted into production of furniture.

Research scholars and students are asked to attend this important seminar and get benefited by it.
